

The Smart Beauty Project Migration Brief

The last site to leave Manus. A one-page site whose three buttons all lead to placeholders.

SITE	www.thesmartbeautyproject.com
WHAT IT IS	A program of 7Band Inc. (the nonprofit)
LIVES ON	Manus (to be replaced)
CODE	github.com/eastmalik/smart-beauty-project (PRIVATE)
DOMAIN	Registrar to confirm — see Section 1
STATUS	LIVE — must stay up throughout
BUTTONS	ALL THREE ARE PLACEHOLDERS — see Section 2
TARGET	GitHub Pages, auto-deploy on push

Companion to the 7Band Website Operations & Recovery Manual
and the 7Band Inc. migration brief.

SECTION 1

Start Here

The smallest site in the ecosystem: one page, six sections (hero, mission, free resource, eBook, donate, footer). The hosting work is the Arise pattern again. The real work is that nothing on the page leads anywhere yet.

WHAT THE SCAN FOUND

- 1. Every button is a placeholder.** "Get Free Access Now" opens a Google Form address containing the word PLACEHOLDER. "Purchase the eBook" goes to **example.com**. "Donate Now" opens another PLACEHOLDER Google Form. Visitors who click any of them land on an error page.
- 2. A Google Form is not a donation.** The plan was a form asking for name, email, phone and amount. That records a pledge; no money moves. Donations should go through the same processor chosen for 7Band Inc., since this is its program.
- 3. The hero says "501(c)(3) Nonprofit".** The Smart Beauty Project is a *program* of 7Band Inc.; it is not itself a 501(c)(3). And the eBook carries a five-star "Reader Approved" badge with no reviews behind it. Section 3.
- 4. There is no way to contact anyone.** No email, phone or contact form anywhere on the page.

Before touching any code

- **The repository is private.** Free GitHub Pages needs it public (Settings → General → Change visibility), as was done for 7band-inc, or a GitHub Pro plan. Check the code for secrets before flipping it; the scan found none.
- **Re-sync from Manus.** The newest code on GitHub is dated **3 August 2026**. If the site changed in Manus after that, push from Manus to GitHub first.
- **Find out where thesmartbeautyproject.com is registered.** If it is in Hostinger, the switch is two DNS records, as for 7bandinc.org. If it was bought through Manus or elsewhere, sort out the domain before anything else, and do not cancel Manus until it is safe. Note any MX records (email) and leave them alone.
- **Do 7Band Inc. first.** This site depends on decisions made there: the donation processor, the 501(c)(3) answer and the GoHighLevel tagging.

SECTION 2

Make the Three Buttons Real

Each one needs something real at the other end before code can point at it. Malik supplies the destination; the site only links to it.

Button	Points at today	Needs
Get Free Access Now	A Google Form address containing PLACEHOLDER	The toolkit itself (does it exist yet?), delivered after an email opt-in: a GoHighLevel form and automation that sends the download, tagged Smart Beauty.
Purchase the eBook ("from \$9.99")	https://example.com/ebook	A real checkout: Stripe Payment Link, Gumroad, Payhip or a GoHighLevel order form. Paid into 7Band Inc.'s account, not a personal one.
Donate Now	A Google Form address containing PLACEHOLDER_FORM_ID	The 7Band Inc. donation page, designated for Smart Beauty if the processor allows it.

- The amount buttons (\$10, \$25, \$50, \$100, \$250, Custom) do nothing today. Either pass the amount to the donation page, if the processor supports it, or remove them and let the processor's page ask.
- Constants to change: `FREE_RESOURCE_URL` in `FreeResourceSection.tsx`, `EBOOK_PURCHASE_URL` in `EbookSection.tsx`, `GOOGLE_FORM_URL` in `DonateSection.tsx`.
- Until a destination exists, hide that button or show "Coming soon". A button that opens an error page costs more trust than no button.
- Add a contact line in the footer: an email address that actually receives mail.

SECURITY: NEVER PASTE KEYS INTO THE CHAT

Malik should never paste a GoHighLevel API key, a Stripe secret key, a token or a password into a Claude chat. Payment links, form links and webhook URLs are fine; they are public anyway.

SECTION 3

Claims on the Page

Not legal advice. Points to confirm with Malik before the new site goes live, following whatever he decided for 7Band Inc.

On the page	Problem	Direction
Hero stat: "501(c)(3) Nonprofit"	The project is a program, not a separate charity. And 7Band Inc.'s own status needs confirming (7Band Inc. brief, Section 3).	"A program of 7Band Inc., a 501(c)(3) nonprofit", once the IRS letter is confirmed.
eBook: five stars and "Reader Approved"	Implies reviews that are not shown and may not exist. The FTC's 2024 rule on fake reviews covers ratings shown without real reviews behind them.	Remove until there are real reviews to show.
"Empowering Black women since 2022", "Operating since 2022"	Fine if true; check it matches 7Band Inc.'s founding and the project's actual start.	Confirm.
"Your donation directly funds free educational resources ... across the country"	A specific promise about how donations are used.	Keep only if that is how the money is used.
"100% Mission-Driven"	Reads as a statistic; it isn't one.	Fine as a slogan; or cut.

The hero photo has text in it. The code layers three separate masks over the right side of the hero image "to hide any image text". That usually means a generated image with stray lettering. Replacing it with a clean photo would let the masks go.

SECTION 4

Media Still on Manus

Four files load from Manus's storage. Malik downloads them from the Manus project; they go into `client/public/`.

File	Used on
logo-icon_caa36e32.png	Navbar and footer
hero-main_1ea35f32.jpg	Hero (see the note above)
ebook-cover_3f11228b.jpg	eBook section
community-section_7e8141ae.jpg	Donate section background

SECTION 5

Order of Operations

The same sequence as 7Band Inc. DNS changes last.

Phase 1 — Prepare, with nothing switched over

- 1 Make the repository public (or go Pro), re-sync from Manus, clone, `pnpm install`, `pnpm check`; confirm a clean build.
- 2 Remove the Manus pieces: `Map.tsx` (it points at a Manus maps proxy), `ManusDialog.tsx`, `const.ts`, `client/public/__manus__`, the Manus plugins in `vite.config.ts` (copy the clean one from 7band-financial) and the umami script in `index.html`. The Express server is not needed.
- 3 Add the deploy workflow, a CNAME file with `www.thesmartbeautyproject.com`, the 404 fallback and favicons.
- 4 Bring the four images in. Wire the three buttons, or hide the ones without a destination.
- 5 Fix the claims in Section 3 and add a contact line.

Phase 2 — Stand the new hosting up alongside the old

- 1 **Settings** → **Pages** → **Source: GitHub Actions**. Leave the custom domain empty for now.
- 2 Merge to main and review at `eastmalik.github.io/smart-beauty-project`. Click every button.

Phase 3 — The switch

- 1 Write down the current @ and www records wherever the domain lives. That is the rollback plan.
- 2 Enter **www.thesmartbeautyproject.com** as the custom domain in Settings → Pages.
- 3 Point **www** (CNAME) and **@** (ALIAS, or GitHub's four A records if the registrar has no ALIAS) at **eastmalik.github.io**. Leave MX and TXT alone.
- 4 Wait for the certificate, tick **Enforce HTTPS**, and test every button from the live domain.
- 5 Confirm the four Smart Beauty links on 7bandinc.org still open the site.
- 6 Leave Manus running a week. This is the last site, so after that Manus can be cancelled, once every brief's "once it is live" checks have passed.

Verify before declaring done

Check	What good looks like
Free resource	Opt in with a test email; the toolkit arrives and the contact is in GoHighLevel, tagged Smart Beauty.
eBook	Checkout opens, a test purchase completes and delivers the file, and the money lands in 7Band Inc.'s account.
Donate	Opens the real donation page; a small test gift is receipted.
No placeholders	No PLACEHOLDER or example.com anywhere in the code.
Claims	501(c)(3) wording and the star rating fixed as agreed.
No Manus requests	All images load from the repository.
HTTPS	Both thesmartbeautyproject.com and www load with a padlock.

How to use this brief

Upload this to the new Claude Code session together with the Operations Manual and the 7Band Inc. brief. Point it at eastmalik/smart-beauty-project. Ask Malik for the three destinations (toolkit, eBook checkout, donation page) first; the rest is quick.
